

# Introduction to GPS Navigation Seminar

Do you want to better understand GPS technology and what it can and can't do for you? This half day **Global Positioning System** Seminar will show you how it can work for you. This seminar covers the basic operation of a GPS Receiver. Participants will gain life saving map reading and GPS navigation skills. The seminar is conducted in the classroom and we go briefly outside to practice acquiring a GPS signal. It will cover the following points:

## **Global Positioning System**

- Introduction to GPS.
- Programming a GPS Unit.
- Waypoint Setting and Marking.
- GPS Navigation.
- GPS Tracking
- Improving GPS performance.
- Wet and Cold Weather Operations.
- Uploading and Storing GPS Waypoints and Tracks

## **Wilderness Navigation**

- Latitude and Longitude.
- **MGRS Grid System.**

This is the seminar you want if you are thinking of buying a GPS, or would like to find out if you need a GPS for wilderness navigation. If you want to see the wilder corners of the world this tool will help you in your quest! If you already own a GPS, make sure you bring your GPS Receiver and its manual out to the course.
